

CONGRESS OF THE EUROPEAN
ASSOCIATION OF POISONS
CENTRES AND CLINICAL
TOXICOLOGISTS

24 may 2016
to MADRID
27 Hotel NH Eurobuilding

Themes and Topics of the 36th EAPCCT Main Congress

The principal themes of the academic programme of the Congress are: Household product safety; aerotoxic syndrome; e-cigarettes – the good, the bad and the ugly; toxic aspects of ammunition; clinical toxicology of cannabis and cannabinoids; current challenges of opioids; advances in critical care of poisoned patients: imaging and treatment; risk communication - detection, assessment, management and communication of risk in mass human toxic exposures.

Poster discussion session

We will continue enhancing the prominence of poster presentations and include daily discussion sessions dedicated to poster presentations of special or controversial interest. We would like to encourage you to submit your outstanding work – the Scientific Committee will select abstracts for discussion and presentation by the authors to a wider Congress audience.

Poisons and toxicology in arts and culture

Finally, each year we receive several abstract submissions on the more cultural or historical aspects of toxicology – we hope to include a short session devoted to these if there is time and material!

Abstract Submission Guidelines

The EAPCCT Scientific and Meetings Committee, chaired by Ana Ferrer Dufol, will evaluate the abstracts. All abstracts accepted for presentation at the Congress will be published in *Clinical Toxicology*, the official journal of the EAPCCT, the AACT and the AAPCC. The Scientific and Meetings Committee's decision will be final.

Abstracts must be submitted electronically via the Congress Secretariat's website by midnight (GMT+1) on Monday 9th November 2015 to be considered by the Scientific Committee. If you request help with English it is important to submit well before the final submission date. If you submit after 2nd November there is no guarantee that there will be time to supply help with English before the review process starts.

Instructions must be adhered to strictly. As time does not permit return of inadequately prepared abstracts for revision, they will be rejected! An exception may be made for minor correctable errors, at the discretion of the Scientific Committee.

Abstracts received after 9th November 2015 will not be considered for the meeting.

If you do not have access to the Internet, or you encounter technical problems that prevent you from submitting on-line, please contact the Congress Scientific Secretariat who will assist with technical problems.

Abstract format

These instructions give general guidance for format although the electronic submission tool will format much of your abstract automatically. However, you are strongly advised to pre-prepare your abstract, using the guidance notes below, before attempting to submit your work on-line, since each session on-line is time limited. **Please note: Graphs and other figures are not permitted.**

- Authors should be listed using surname and given name plus any other initial(s). Omit titles, degrees, and academic appointments and do not separate initials with punctuation e.g. Smith Martin P or Jones J Charles.
- The affiliation must comprise ONLY department name, institution, city and country.
- The body of the abstract should be organized as outlined below. You must include the underlined words in the body of your abstract.

Objective: A statement of the purpose or reason for the report.

Methods: A brief description of the study design.

Results: A summary of the results presented in sufficient detail to support the conclusion. Data must be presented in the abstract. Statements such as “the results will be presented” or “other data will be presented to support....” will result in automatic rejection of the abstract.

Conclusion: A statement of the conclusion based on the data presented.

References: All references should appear at the end of the abstract in numerical order as they appear in the text. Please cite references in the text by a number in superscript. Follow the referencing style below. In general the number of references used should be limited to 5 or less. References are included in the word count.

- References for **Journal articles** should be formatted as in the following example: Giannini L, Vannacci A, Missanelli A, et al. Amatoxin poisoning: a 15-year retrospective analysis and follow-up evaluation of 105 patients. Clin Toxicol 2007; 45:539-42.
- References for **Book chapters** should be formatted as follows: Goadsby PJ. Pathophysiology of headache. In: Silberstein SD, Lipton RB, Dalessio DJ, eds. Wolff's headache and other head pain. 7th ed. Oxford, England: Oxford University Press, 2001:57-72.
- For case reports or case series, the words **Case report:** or **Case series:** replace the Methods: and Results: headings. Otherwise, the format remains the same.
- Reports of non-clinical studies, such as those describing poisons centre operations or educational tools should attempt to follow these guidelines as closely as possible.
- The number of words is limited strictly to 400 excluding the title, authors and affiliations, but including the references. Each word or number is counted as one word whether it is one character or 10 characters long. (The previous sentence has a word count of 18).
- Please do NOT use automatic Word functions, e.g. numbering, bullet points or footnotes.
- Use of tables creates editorial difficulties and these are therefore discouraged. However, you may include one simple table
- Figures and graphs/diagrams are not allowed.

000. This is an example of abstract style

Martin P Smith¹, Z Nicholas Jones², Thomas Brown¹

¹Department of Toxicology, Royal Hospital, Townsville, Germany; ²Poisons Unit, Infirmary, Townsville, Czech Republic

Objective: A statement of the purpose or reason for the report.

Methods: A brief description of the study design.

Results: A summary of the results presented in sufficient detail to support the conclusion. Data must be presented in the abstract. References should be indicated in the text like this.¹ Statements such as “the results will be presented” or “other data will be presented to support....” will result in automatic rejection of an abstract.

Conclusion: a statement of the conclusion based on the data presented.

Notification of abstract receipt

- The on-line submission tool will allocate your abstract a unique identification number. Please note this for your own records.
- E-mails will be sent at the end of on-line submission to confirm receipt of your submission. We recommend you keep a copy of this for your records.
- Please note that after successful on-line submission it is NOT necessary to provide documentation by mail or e-mail.
- Submitters will be notified of the acceptance or rejection of their abstract by Friday 5th February 2016 by email. Please ensure your e-mail details are entered correctly in the online abstract submission tool.
- All abstract presenters must register for the Congress by **Monday 29th February 2016**. Failure to do so will result in the abstract being withdrawn from publication, and will result in administrative rejection of the abstract.

DOs and DON'Ts for abstract submission

The EAPCCT wants to accept as many abstracts as possible for the Congress, so here are a few DOs and DON'Ts in order to try and ensure that your abstract is accepted.

If you would like help with:

- (a) the scientific content - contact the EAPCCT Scientific Committee early (gs@eapcct.org)
- (b) writing the abstract in English – contact the Abstract Editor (sc@eapcct.org), who will be happy to hear from you as early as possible.

Please read the instructions above regarding submission guidelines.

DO:	DON'T:
Submit your abstract early if you would like help with English language.	Submit at the last moment as there is very little time after the submission deadline before the review process starts.
Explain in your abstract why the information is novel, unusual or adds something useful.	Submit a case study involving a well-known drug and a previously reported feature.
For studies of poisons centre enquiries, make sure there is something new or unusual.	Submit a study of all enquiries to a poisons centre without any particular discussion of some special aspect.
Make your title descriptive of the subject of the abstract.	Use abbreviations in the abstract title.
You MUST use the headings suggested – (objective, methods, results or case report/series and conclusion).	Submit an unstructured abstract without headings.
Explain all but the most common abbreviations (e.g. BP, Temp, pCO ₂) the first time they occur in the text.	Use abbreviations that are specific to one country without explanation.
Make sure all symbols are easily identifiable.	Use Greek symbols that may become distorted in the system. Use “micrograms” rather than “μg” or “ug” to avoid confusion.
Include data (i.e. numerical results) in the abstract.	Say evidence will be reported. Such abstracts will have to be altered or will be rejected.
Make sure your conclusions can be justified from the data you have provided	Draw unjustifiable conclusions, e.g. on effectiveness of therapy from observations made in a single case report.
Include references to published papers , if appropriate (not more than 5).	Reference standard textbooks unless absolutely necessary. Books in languages other than English may not be available to other attendees.
Enter references fully according to the formatting instructions in the booklet.	Enter partial references. Use PubMed (http://www.ncbi.nlm.nih.gov/pubmed/) for full referencing.
Add suitable keywords so that the interested reader can find the abstract.	Include “poisoning” as a keyword as almost all the abstracts could be keyworded that way.
